PredictiveIQ Selected to Present at Prestigious Venture Summit West

Silicon Valley, CA – March 27th 2025 – PredictiveIQ is proud to announce that it has been selected to present at the upcoming Venture Summit West, taking place on April 2nd & 3rd, 2025 at the Computer History Museum in Silicon Valley. Organized by youngStartup Ventures, the summit is the region's premier event for connecting the most promising startups with the venture capital, corporate venture, and angel investor communities.

Venture Summit West 2025 will feature over 150 top innovators across numerous sectors. Each presenting company was carefully chosen by the youngStartup Venture team and advisors, ensuring that the innovations showcased are at the forefront of their respective fields. From revolutionary biotech solutions to cutting-edge AI technologies and sustainable energy advancements, these startups represent the best and brightest talent shaping the future of innovation.

This prestigious gathering offers a rare opportunity for attendees to witness transformative ideas and connect with the visionaries behind them. With PredictiveIQ joining this elite group, we have the exciting opportunity to showcase our groundbreaking highly predictive Physics-Informed AI platform that empowers businesses to accelerate engineering processes, enhance asset performance, and optimize operations to an audience of leading investors, industry experts, and fellow entrepreneurs.

"We are honored to participate in this highly regarded event and look forward to the chance to connect with visionary investors and leaders," said Juan F. Betts, CEO of PredictiveIQ. "This platform provides an unparalleled opportunity for startups like ours to gain visibility and accelerate growth."

About Venture Summit West

Hosted by youngStartup Ventures, Venture Summit West is a must-attend gathering for investors, entrepreneurs, and thought leaders. Attendees will engage in meaningful networking, hear from industry leaders, and explore the latest trends shaping the future of innovation.

About PredictiveIQ.

PredictiveIQ develops highly predictive Physics Informed AI Agents that Accelerate Engineering Design, Enhance Asset Performance, and Optimize Fleet Operations of Cyber-Physical Systems. Physics Informed AI utilizes advanced neural architectures and physics informed machine learning techniques, giving it broad predictive capability while being data efficient. This capability can be deployed, embedded, on-edge or on-cloud, providing our customers with real-time actionable decision-making. A leading application for this capability is Predictive Maintenance Digital Twins, which can be applied in industries such as: Defense, Mining, Transportation, Oil & Gas, Agriculture, Marine, Automotive, and Aerospace.
